Social Impact Analysis Laurence R. Goldman,2020-08-20 This book addresses the nature, purpose and processes associated with social impact analysis. Because resource development projects occur in human as well as ecological environments, stakeholders - landowners, companies and governments - are compelled to ensure that the benefits of any project are maximized while the negative risks are minimized. Achieving such objectives means implementing programs which monitor and evaluate the ongoing effects of a project on the social and cultural lives of the impacted populace. This book aims to provide a teaching and training resource for students, social scientists (anthropologists, sociologists, human geographers, environmentalists, engineers, etc.) and indigenous personnel and operators who are tasked with community affairs programs in those countries where resource development projects are implemented. The constituent chapters provide how-to guides and frameworks that are generously illustrated with case studies drawn variously from North America and the Asia-Pacific region. Topics addressed include Legal Frameworks and Compliance Procedures, Social Mapping, Environmental Reports, Social and Economic Impact Studies, Social Monitoring Techniques, Project Development, Statistical Packages and Report Production.This book is unique in so far as it seeks to prioritize application over theory. Moreover, it is the first training resource that is sensitive to non-western indigenes' need to assimilate and apply skills engendered by Western countries.

The Impact of Climate Change Mitigation on Indigenous and Forest Communities Maureen F. Tehan,Lee C. Godden,Margaret A. Young,Kirsty A. Gover,2017-10-26 The international legal framework for valuing the carbon stored in forests, known as 'Reducing Emissions from Deforestation and Forest Degradation' (REDD+), will have a major impact on indigenous peoples and forest communities. The REDD+ regime contains many assumptions about the identity, tenure and rights of indigenous and local communities who inhabit, use or claim rights to forested lands. The authors bring together expert analysis of public international law, climate change treaties, property law, human rights and indigenous customary land tenure to provide a systemic account of the laws governing forest carbon sequestration and their

interaction. Their work covers recent developments in climate change law, including the Agreement from the Conference of the Parties in Paris that came into force in 2016. The Impact of Climate Change Mitigation on Indigenous and Forest Communities is a rich and much-needed contribution to contemporary understanding of this topic.

Analysis of the Impact on the Traffic Safety System; an Analytic Study J. L. Purswell,1974

Gender Analysis in Papua New Guinea Elizabeth C. Brouwer,Bruce M. Harris,Sonomi Tanaka,1998-01-01 In October 1996, The East Asia and Pacific Region developed a Regional Gender Action Plan that stressed the importance of country-specific strategies regarding gender issues. This report on gender in Papua New Guinea intends to lay the foundation for such a strategy. The report provides an outline of the key historical, economic, demographic, political, geographic, socio-cultural, legal and institutional issues that are relevant to understanding the status of women in Papua New Guinea today.

Handbook of Research on Driving Socioeconomic Development With Big Data Sun, Zhaohao,2023-02-24 Socioeconomic development has drawn increasing attention in academia, industries, and governments. The relationship between big data and its technologies and socioeconomic development has drawn certain attention in academia. Socioeconomic development depends not only on big data, but also on big data technologies. However, the relationship between big data and socioeconomic development is not adequately covered in current research. The Handbook of Research on Driving Socioeconomic Development With Big Data provides an original and innovative understanding of and insight into how the proposed theories, technologies, and methodologies of big data can improve socioeconomic development and sustainable development in terms of business and services, healthcare, the internet of

everything, sharing economy, and more. Covering topics such as corporate social responsibility, management applications, and process mining, this major reference work is an excellent resource for data scientists, business leaders and executives, IT professionals, government officials, economists, sociologists, librarians, students, researchers, and academicians.

Community Level Assessment of the Impact of Mining (C.L.A.I.M.) Papua New Guinea Naomi Kinsella,Eddie Tanago,Roddy Mesa,Marjorie Warisaiho,2014-02-28 ABOUT CLAIM. Community Level Assessment of the Impact of Mining, or "CLAIM", is a human rights assessment methodology developed by the Centre for Environmental Law and Community Rights (CELCOR), Live and Learn PNG, and the American Bar Association Rule of Law Initiative (ABA ROLI). CLAIM is a practical tool for use by organizations like CELCOR and Live and Learn to work with local communities to assess the human rights impact of mining projects, and identify remedies for mining-related harms. CLAIM is

intended as a first step in providing longer-term support to mining-affected communities. CLAIM will produce a report detailing the positive and negative impacts of the mine, and possible strategies or remedies for the community to pursue depending upon their desired goal. The manual content is based on visits that CELCOR and ABA ROLI made to mining affected communities and several workshops with environmental lawyers and civil society leaders. CELCOR and ABA ROLI would like to thank the people from Kwembu, Winima, Sam Sam, Sambio, Labu, and Markham who took the time to share their experiences. We are also grateful to the staff at the Mineral Resources Authority, the State Solicitor's Office of the Department of Justice and Attorney General, the Department of Petroleum and Energy, and the Department of Mineral Policy and Geo-Hazard Management for meeting with the CELCOR-ABA ROLI project team and sharing their knowledge about the mining and oil and gas industries; as well as to the UN Office of the High Commissioner for Human Rights and the Sustainable Development Strategies Group for sharing their expertise on human rights and business. Additionally, we thank all CELCOR, Live and Learn, Eco-Forestry Forum, and Greenpeace staff whose knowledge of local law, environmental activism and community mobilization helped create this manual.

The International Model for Policy Analysis of Agricultural Commodities and Trade (IMPACT): Model documentation for version 3.6. Modeling Systems Technical Paper 1 Robinson, Sherman,Dunston, Shahnila,Mishra, Abhijeet,Sulser, Timothy B.,Mason-D'Croz, Daniel,Robertson, Richard D.,Cenacchi, Nicola,Thomas, Timothy S.,Zhu, Tingju,Gueneau, Arthur, The International Food Policy Research Institute's IMPACT model is a robust tool for analyzing global and regional challenges in food, agriculture, and natural resources. Continuously updated and refined, IMPACT version 3.6 is the latest update to the model for continuously improving the treatment of complex issues, including climate change, food security, and economic development. IMPACT 3.6 multimarket model integrates climate, crop simulation, and water models into a comprehensive system, providing decision-makers with a flexible platform to assess the potential impacts of various scenarios on biophysical systems, socioeconomic trends, technologies, and policies.

Archaeological Research at Caution Bay, Papua New Guinea Thomas Richards,Bruno David,Ken Aplin,2016-12-31 The first volume of the Caution Bay monographs is designed to introduce the goals of the Caution Bay project, the nature and scope of the investigations and the cultural and natural setting of the study area.

A Situational Analysis of Children and Women in Papua New Guinea ,2001

Customary Land Tenure and Registration in Australia and Papua New Guinea James F. Weiner,Katie Glaskin,2007-06-01 The main theme of

this volume is a discussion of the ways in which legal mechanisms, such as the Land Groups Incorporation Act (1974) in PNG, and the Native Title Act (1993) in Australia, do not, as they purport, serve merely to identify and register already-existing customary indigenous landowning groups in these countries. Because the legislation is an integral part of the way in which indigenous people are defined and managed in relation to the State, it serves to elicit particular responses in landowner organisation and self-identification on the part of indigenous people. These pieces of legislation actively contour the progressive evolution of landowner social, territorial and political organisation at all levels in these nation states. The contributors to this volume provide in-depth anthropological case studies of social structural and cultural transformations engendered by the confrontation between states, developers and indigenous communities over rights to customarily owned land.

The Data Analysis Workshop Gururajan Govindan,Shubhangi Hora,Konstantin Palagachev,2020-07-29 Learn how to analyze data using Python models with the help of real-world use cases and guidance from industry experts Key FeaturesGet to grips with data analysis by studying use cases from different fieldsDevelop your critical thinking skills by following tried-and-true data analysisLearn how to use conclusions from data analyses to make better business decisionsBook Description

Businesses today operate online and generate data almost continuously. While not all data in its raw form may seem useful, if processed and analyzed correctly, it can provide you with valuable hidden insights. The Data Analysis Workshop will help you learn how to discover these hidden patterns in your data, to analyze them, and leverage the results to help transform your business. The book begins by taking you through the use case of a bike rental shop. You'll be shown how to correlate data, plot histograms, and analyze temporal features. As you progress, you'll learn how to plot data for a hydraulic system using the Seaborn and Matplotlib libraries, and explore a variety of use cases that show you how to join and merge databases, prepare data for analysis, and handle imbalanced data. By the end of the book, you'll have learned different data analysis techniques, including hypothesis testing, correlation, and null-value imputation, and will have become a confident data analyst. What you will learnGet to grips with the fundamental concepts and conventions of data analysisUnderstand how different algorithms help you to analyze the data effectivelyDetermine the variation between groups of data using hypothesis testingVisualize your data correctly using appropriate plotting pointsUse correlation techniques to uncover the relationship between variablesFind hidden patterns in data using advanced techniques and strategiesWho this book is for The Data Analysis Workshop is for programmers who already know how to code in Python and want to use it to perform data analysis. If you are looking to gain practical experience in data science with Python, this book is for you.

Social Determinants of Women's Health in Low and Middle Income Countries Rubeena Zakar,Parveen Ali,Gaurang Baxi ,Sarosh Iqbal,2024-11-11 It is well-established that the social determinants of health (SDH) highly influence health outcomes and inequities. This is particularly true in low-and-middle income countries, where women are deprived of their basic rights including access to health services, appropriate nutrition, and education. Socio-cultural practices, such as child marriages, forced marriages, cousin marriages, female genital mutilation, and son-preference, undermine women health and well-being. Additionally, various negative stereotypes, such as pregnancy and childbirth-related taboos, dowry and honor-related violence, restrictions on women's mobility and social participation are significantly associated with women's health status. To improve women's sexual and reproductive health, societies must take comprehensive and integrated measures to address these cultural stereotypes and harmful sociocultural practices against women. A SDH approach dictates that health is shaped importantly by various individual factors and community norms that further enable or constrain health. Individual factors include education, income, ethnicity, and the environment wherein people live (including their families, communities and workplace). Macro-level social factors include the labor market, schools, healthcare systems, legal systems, institutionalized practices, and ideologies. In many low-and-middle-income countries, women are still socially excluded and

economically marginalized. They lack opportunities for education, economic growth, and political participation. There are many social drivers associated with maternal health. Many negative life experiences such as infertility and perinatal loss, poverty, discrimination, social inequalities, lack of autonomy, violence, economic dependency, and isolation have long-lasting impact on mothers' mental health and wellbeing. To comprehensively understand the drive of maternal health, a multilevel and bio-social approach of social determinants of women's health is integral.
