Geriatric Emergency Medicine

Christian Nickel,Abdelouahab Bellou,Simon Conroy,2017-12-11 This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment,and in providing timely and adequate care. Particular attention is paid to the commonpitfalls in emergency management andmeans of avoiding them. Between 1980 and 2013, the number of older patients in emergency departmentsworldwide doubled. Compared with younger patients, older people suffer from more comorbidities,

a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field.

The Alcoholism and Addiction Cure Chris Prentiss,Pax Prentiss,2010-04-20 The Alcoholism and Addiction Cure contains the powerful three-step program to total recovery that is the basis of the miraculous success of the Passages Addiction Cure Center in Malibu, California. You'll learn the three steps to permanent sobriety; the four causes of dependency; how your thoughts, emotions, and beliefs are key factors in

your recovery; and how to create your own personalized treatment program with the help of health professionals where you live-one that gets to the real, underlying causes of dependency. Freedom from dependency starts with understanding that alcohol, drugs, and addictive behaviors are not the real problems, say Pax and Chris Prentiss, cofounders of Passages. Alcohol, street drugs, nicotine, prescription medications, food bingeing, gambling, and the like are merely the substances or behaviors you or your loved ones are using to cope with the real problems-anything from deep emotional pain, ill health, or depression to hypoglycemia, a sluggish thyroid, or brain-wave pattern imbalances. Once the underlying problems are discovered and cured, the need for drugs, alcohol, or addictive behavior will disappear-along with the craving. Chris Prentiss

should know. His son Pax was addicted to heroin, cocaine, and alcohol for ten years. They sought help everywhere, but Pax relapsed again and again. In desperation, they finally created their own holistic, hand-tailored program that was a complete break from all other programs and that combined several effective therapies. It saved Pax's life. Together, father and son founded Passages to help others find their own freedom. For decades, we've been hearing that alcoholism and addiction are incurable diseases, but The Alcoholism and Addiction Cure proves that this is a dangerous myth and that the label of alcoholic or addict destroys the promise of full recovery. Visionaries and innovators, Pax and Chris Prentiss bring new hope to people everywhere who are dependent on drugs, alcohol, or addictive behaviors. This groundbreaking approach will show you how to end relapse, end addictive behavior, and end your suffering.

Pretty Takes Practice Charla Muller, 2014-08-05 Charla Muller's first book, 365 Nights, was called

"entertaining" (Albuquerque Journal), "surprising [and] remarkable" (The Independent [London]). It also launched her into the public eye—and brought her to a moment of painful realization . . . For an average working mom like Charla, going on a book tour was both intimidating and exciting. It also turned out to be horrifying: When she saw herself on a screen in glorious, unforgiving HD, it magnified all her flaws, prompted comments from unadoring fans, and forced her to reevaluate her (lack of) exercise regimen. But Charla was jolted into action and used that cringe-inducing close-up as a wakeup call. After shedding a few tears over how she'd let herself go (and over the five-year-old discount sweater she wore on Oprah), she set out on a strange, hilarious, and poignant journey that tapped into and tested her values, her beliefs about beauty, her self-image, and, of course, her relationship with her mother. In this lively, funny, moving account, a Southern woman shares stories she swore she'd never tell—and ultimately offers some unexpected and universal insight about how pretty takes practice.

Heat-health Action Plans

Franziska Matthies, G. Bickler, Simon Hales, N. Cardeñosa Marín, 2008 Climate change is leading to variations in weather patterns and an apparent increase in extreme weather events, including heat-waves. Recent heat-waves in the WHO European Region have led to a rise in related mortality

but the adverse health effects of hot weather and heat-waves are largely preventable. This guidance results from the EuroHEAT project on improving public health responses to extreme weather/heatwaves, co-funded by WHO and the European Commission. It explains the importance of the development of heat-health action plans, their characteristics and core elements, with examples from several European countries that have begun their implementation and evaluation.

Operational Framework for Building Climate Resilient Health Systems World Health Organization, 2016-02-15 This document presents the World Health Organization (WHO) operational framework for building climate resilient health systems. The framework responds to the demand from Member States and partners for guidance on how the health sector and its operational basis and health systems can systematically and effectively address the challenges increasingly presented by climate variability and

change. This framework has been designed in light of the increasing evidence of climate change and its associated health risks; global, regional and national policy mandates to protect population health; and a rapidly emerging body of practical experience in building health resilience to climate change. Primarily intended for public health professionals and health managers, this framework would also help guide decision-makers in other health-determining sectors, such as nutrition, water and sanitation, and emergency management. International development agencies could use this framework to focus investments and country support for public health, health system strengthening and climate change adaptation. The objective of this framework is to provide guidance for health systems and public health programming to increase their capacity for protecting health in an unstable and changing climate. By implementing the 10 key components laid out in this framework, health organizations, authorities and programs will be better able to anticipate, prevent, prepare for and

manage climate-related health risks. Least developed countries and countries in the process of developing the health components of National Adaptation Plans (NAPs) under the UN Framework Convention on Climate Change (UNFCCC) (4) may find this document particularly useful in their efforts to design a comprehensive response to the risks presented by short-term climate variability and long-term climate change.

Plant, Eric Single, Tim Stockwell, 1997 *Alcohol: Minimising the Harm* presents a non ideological and pragmatic review of the effectiveness of key strategies designed to achieve a significant reduction in levels of problem drinking. These strategies are described and critically assessed by some of the world's leading authorities on the use of alcohol and its related problems. *Alcohol: Minimising the Harm* is wide-ranging and international in scope, including evidence from non-industrial societies. The evidence is considered within the context of the history of alcohol control policies and the ongoing polemic concerning the harm minimisation approach to problems associated not

only with alcohol but also tobacco and illicit drugs. Strategies and policies are critically and pragmatically assessed in the light of the question, 'What works?'
